

Lisle Township

Partnership and Fundraising program
Putting the "community" in Community Solar

What is Community Solar?

IT'S LIKE A COMMUNITY GARDEN, BUT FOR CLEAN ENERGY!

Subscribe to clean, renewable energy from your local solar farm

Nothing on your property

No upfront costs

Receive a 20% discount on your utility supply costs

How It Works

Your Solar Farm

We allocate you a portion of a shared solar farm in your area that will produce clean, renewable energy on your behalf.

Your Utility

The electricity is sent to your utility company. You will see a discount on your normal utility bill for the electricity produced by your allocation.

Households & Businesses

Your lights turn on as always: no installation, extra costs, or additional downtime. Congrats, you finally get to benefit from affordable clean energy!

Solstice & Lisle Township

BUILDING A SUCCESSFUL CAMPAIGN

Approve Solstice Partnership

Set the Goals for the Partnership: Households will receive a \$100 enrollment bonus and 20% savings on the supply side of their ComEd bills. Lisle Township will also receive \$100 for each person who enrolls. Do we want to have a goal for the number of enrollments and / or a specific project identified for the funds to support?

Timeframe: Lisle Township and Solstice will be working together to educate and sign up our community from now through the end of May 2022 (or spots fill up).

Tailor outreach plan for Lisle Township

Watch the sign-ups and donations roll in!

How will we reach your goals?

Campaign Kickoff & Awareness

- Events (in person or Zoom)
- Social Media
- Emails
- Mailers
- Whatever suits Lisle Township

Interest

- Your Solstice web page
- Sign-up sheets
- Email
- Phone

Enrollment & Engagement

- Self-enrollment
- Phone Consultations
- Donations
- Sign-on Bonuses
- Campaign Updates
- Customer Support

Community Solar Agreement Details

Subscription details:

Savings Rate

20% discount on all solar credits applied to subscribers' bills. Credits will be subtracted from the supply portion of subscribers' monthly electric bills. This discount is contractually guaranteed for the duration of your subscription.

Length of subscription

15 years (with the option to renew at the end of your term).

Cancellation fee

There is no cancellation fee. We just ask that you provide us 90 days' notice so we can fill your spot in the solar farm. You may continue to pay for credits applied to your bills for 90 days after you give intent to cancel.

Credit requirement

None.

Billing type:

Dual bill. This means you will receive your ComEd bill as normal each month with solar credits applied, along with a separate invoice from Solstice charging you for your credits (at the fixed 20% discount). Combined, these two charges will be lower than your bill prior to the application of solar credits. For more information on billing, see the back of this sheet.

Community Solar Agreement Details

Term of your subscription:	15 years and 0 months
Is early termination of your subscription permitted for reasons other than moving outside of your electric utility service territory?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
The circumstances under which you are permitted to terminate your subscription early are:	You can terminate this agreement at any time, for any reason. Upon any such termination, you will be responsible for paying any outstanding balance of the Subscription Payment for Credits previously received for up to 90 days after termination, but will not be liable to us for any other amounts
Your community solar provider will or will not impose a fee or penalty for early termination of the subscription?	<input type="checkbox"/> Will <input checked="" type="checkbox"/> Will not

Community Solar Agreement Details

For an estimate of the subscription price expressed on a per-kilowatt-hour basis, refer to Exhibit C. The estimated initial price for Credits is calculated as the applicable electricity supply rate published by your utility reduced by the Guaranteed Savings Rate. The price will change over the course of the term as utility rates change, but we will always provide you the discounted rate for Community Solar Credits such that you are always saving on the community solar portion of your bill. You will save 20% off of the value of the Credits received on your Utility Bill each month (the “Guaranteed Savings Rate”).

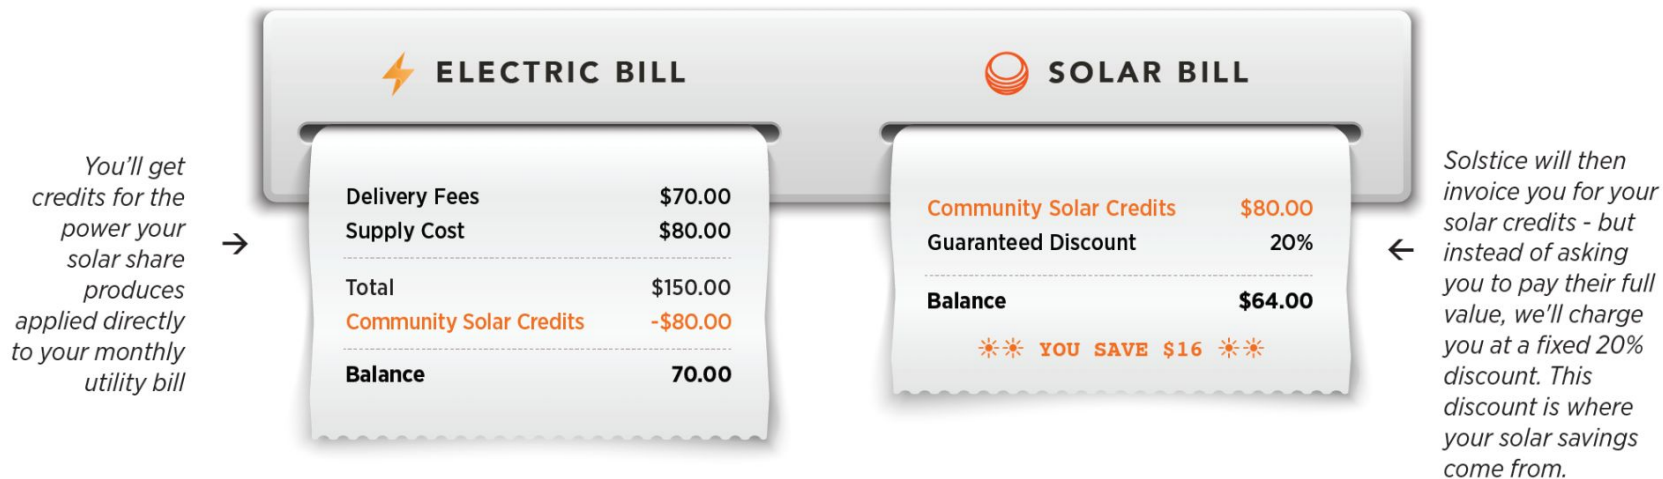

Exhibit C

Based on our best estimate at the time of preparing this document, the approximate subscription price on a per-kilowatt-hour basis is \$0.042824/kWh. This rate may increase or decrease over time, such that your Guaranteed Savings rate is always 20% of the value of the Community Solar Credits, as described in Section 1 of your Community Solar Subscription Agreement. For comparison, the ComEd price for electricity supply as of the time of preparing this document is \$0.0535/kWh. Your Community Solar Credits will be allocated to you on a monthly basis based on the recent production of the solar farm and your subscription size, and should never be more than your monthly supply charge. The amount owed will be 80% of the value of the Community Solar Credits applied in that month. Given the current price of supply in ComEd at the time of preparing this document, the calculation for what will be owed under this agreement is as follows: Payment for Community Solar Credits = (kWh generated from your solar share x \$0.0535)*0.8.

Billing with Solstice

What You'll See on Your Electric Bill

You will continue to receive your regular electric bill each month, with solar credits subtracted from your supply costs. You will then receive an invoice from Solstice charging you for your credits at your project's discount rate.

*The illustration above is not a real utility bill; it is only an example. Savings are based on a guaranteed 20% discount on the solar bill credits generated by your allocation from the community solar farm. The impact of your solar bill credits on your utility charges can vary month to month due to seasonal variances affecting solar energy production.

Local and Regional Partners

Solstice partners with municipalities, townships, residential service organizations, environmental groups, nonprofits, and corporations to bring renewable energy savings to their communities

“

“DuPage Township is proud to have signed up its own municipal meters for community solar with Solstice, which will provide us significant savings on our electric costs each month and help us lower our carbon footprint. We are pleased that many of our residents are following suit in taking advantage of this great opportunity to access the benefits of local clean power.”

GARY MARSCHKE

Town Supervisor, DuPage Township
